

# FtpServer Remote Admin

## Introduction

by Rana Bhattacharyya

---

NOTICE: FtpServer documentation is under construction. Everything you can find outside this page is to be considered obsolete.

---

## 1. Overview

All the FTP server administrative tasks can be performed using remote admin user interface. We can also use SITE command to do that. You can start the admin console using **java -jar ftp-admin.jar**.

The admin UI uses RMI to connect to the server. It also displays the server real-time data.

## 2. Configuration Parameters

**FIXME ():**

To be done.

## 3. Screenshots

**FIXME ():**

To be done.
